Apple itunes & moving songs to computer or into iphone/ipad itunes music collection:

Songs downloaded from iPhone or iPad cannot be moved into iTunes music collection from the Freegal app, you must use a desktop computer to move the song files, otherwise the songs can only be played in the Freegal app from iPhone/iPad.

[How do I backup Freegal Music from my iOS mobile device into iTunes?](#)

Plug your iOS device into your computer

Open up iTunes and you will see an area titled "devices" on the left hand side. Click on the device you desire to take music off of.

At the top of the screen you will have options like "summary, info, apps, music, movies, etc." Select "Apps."

From there, scroll down and select the Freegal app.

Once highlighted, you should view a file that contains the music downloaded from the app.

Take that file and simply drag it to your desktop background. This will save the music to your desktop.

Now that the music is in your desktop, you can move this music into your iTunes through dragging and dropping individual songs into iTunes.

Now your music from the Freegal application is in your iTunes on your computer! From there you can move music anywhere you like!
